W05 Assignment: Personal Website Proposal

Submit a Personal Website proposal idea for your final project:

"The purpose of my website is to showcase my online portfolio, displaying my technical and soft skills, and software projects developed, with the goal of attracting potential employers, clients, and collaborators interested in my work. The target audience includes recruiters, companies, clients, and professionals in the field who are interested in getting to know and evaluate my skills and professional experiences."

Page 1:

The "About Me", or the homepage on my portfolio website will be my presentation page, a business card about me for anyone accessing the portfolio.

Page 2:

The "How I Study" page provides insights and guidance to aspiring web developers, offering information on what, when, and how I study.

Page 3:

 The "How I Work" page showcases my work style, project workflow, and collaboration techniques to potential clients or employers, aiming to instill confidence and demonstrate my professionalism as a web developer.
